

Hyiodine®

DESIGNED FOR HEALING
CHRONIC, DEEP & COMPLICATED WOUNDS

Healing of deep, chronic & complicated wounds

- Wide range of application
- Antimicrobial effect together with biofilm removal
- Actively support healing and granulation

Hyiodine[®]

A row of five glass vials containing dark liquid, with the word "Composition" overlaid in red text. The vials are arranged in a line, with the one on the right being the most prominent and in focus. The background is a light, neutral color, and the lighting creates soft shadows on the surface below the vials.

Composition

Hyiodine

- 1,50 % Hyaluronic acid
- 0,25 % Iodine complex

Hyaluronic acid in wound healing

Healing management

- Modulate inflammation in wound
- Support of viability a migration of skin cells
- Support of vascularization
- Collagen amount decrease – „scarless healing

High affinity to moist environment

- Hydratation of wound bed and atractation of growth factors and minerals
- Negative pressure effect – „natural pump“

Iodine and wound healing

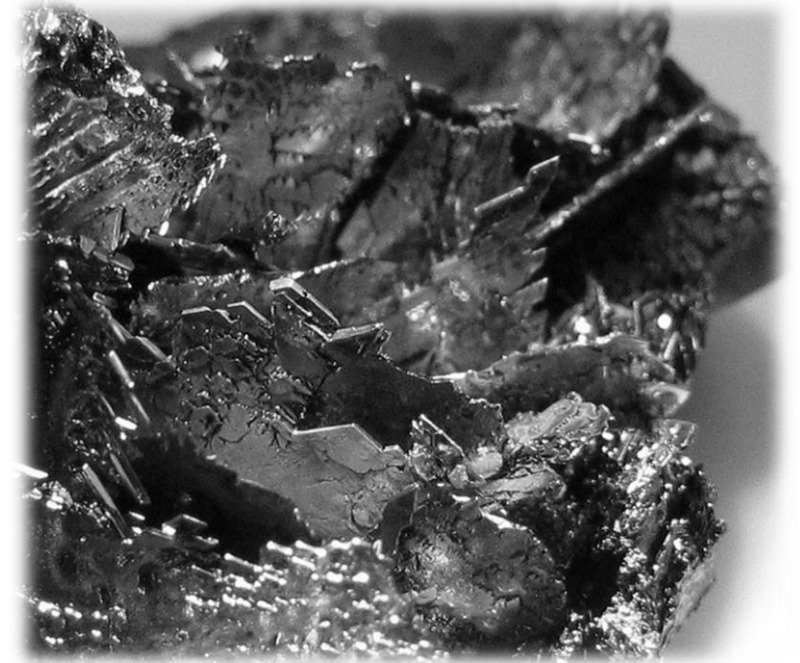

Efficiency

Antiseptic effective against G^+ / G^- bacteria, spores
So far, there is no bacterial resistance
Destroys biofilm

Different forms on market

PVP (Betadine 1.0%)
Cadexamer iodine (Iodosorb 0.9%)
 I_2 (Hyiodine) complex I_2 (0.1%) + KI (0.15% KI)

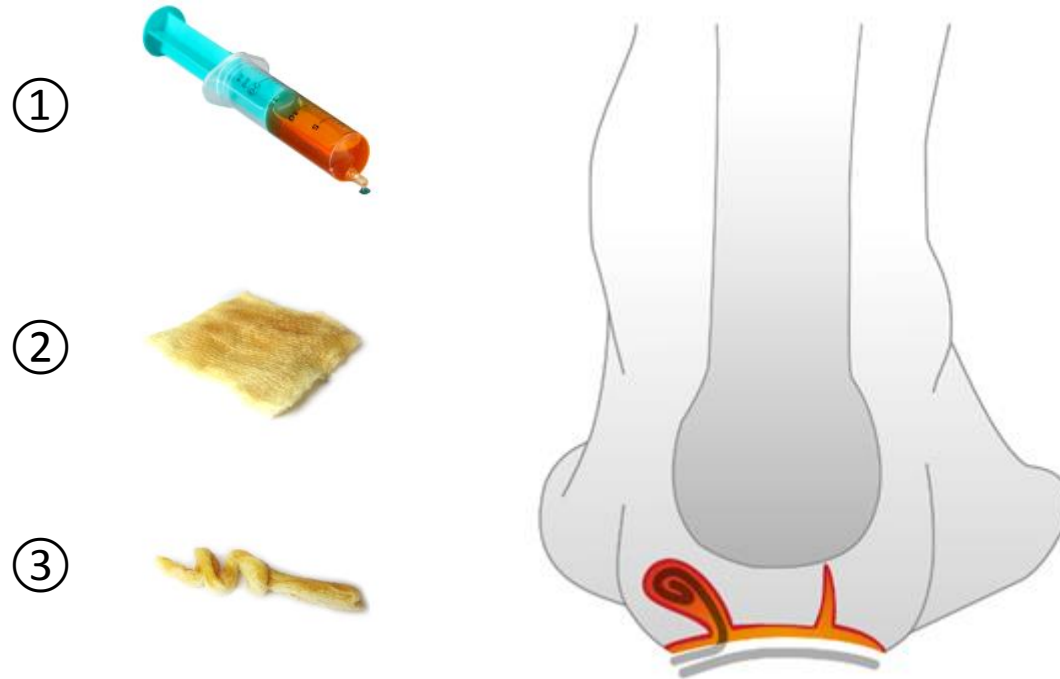

Protects HA against degradation, provides a wound
bacterial infection and form an ideal environment
for wound healing

Application

Healing of deep, chronic & complicated wounds

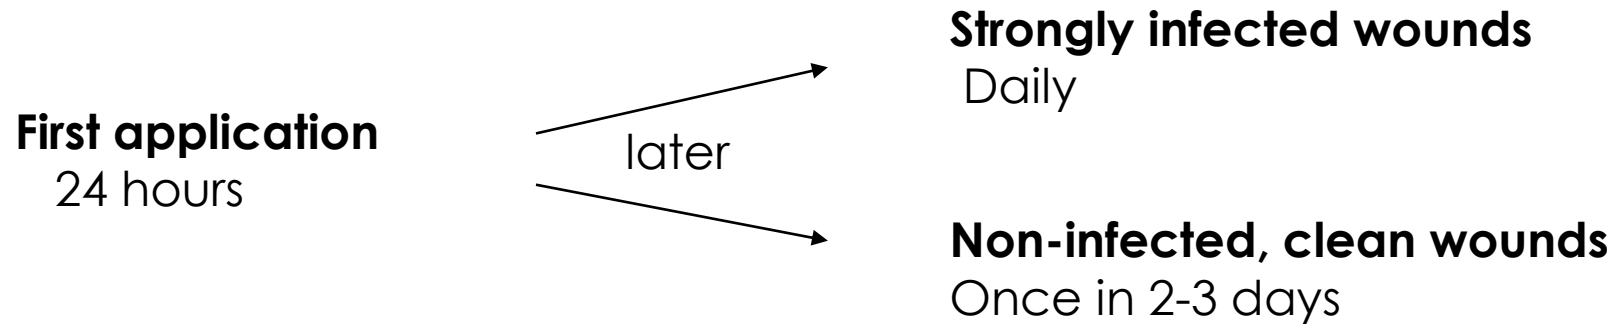

Wide range of application to wound bed

Hyiodine[®]

Hyiodine[®]

Wear time of Hyiodine

Size of wound	Amount	In bottle 50g
5x5 cm (25 cm ²)	2 ml	25x
10x10 cm (100cm ²)	7 ml	7x
15x20 cm (300 cm ²)	22 ml	2x

Shelf life and packaging

- Shelf life 24 months
- Use within 6 weeks from opening (or until color fade away)
- Packaging 22g, 50g
